

Class DAP Sharing Activity

In your small groups, discuss each of the following questions, and then open the floor to any other questions you want to discuss with each other.

If a group member shares an idea and you want to incorporate it into your project, be sure to note it on your integrity page for the assignment. But yes, that is ok so long as you document it. This is a communal learning experience. The aim of the discussion is to help each other think about things and improve everyone's submission.

1. What was the most interesting thing you learned about the data set in your exploratory data analysis?

2. Which model are you currently happiest with and why? How did you get to that model (sense of process)?

3. What is the biggest question you have remaining about the data or your models at this stage? See what the group can help each of you figure out.

4. What are you planning to tell the real estate agent in response to their questions?

5. Is there any task remaining that you want to do (such as making a particular graphic or formatting something a certain way) that you aren't sure how to do? See what your groupmates can help you with.
